

*April 8-9*

*at USC!*

## Southern California's premiere all-female\* hackathon!

### WHAT?

A fun weekend dedicated to filling the gender gap, exploring technology, and building the next big thing.

### WHO?

Hackathon registration is open to any undergraduate, graduate, or high school female\*!

Volunteer registration is open to everyone!

### HOW?

Sign up as a hacker or volunteer online at our website! [www.athenahacks.com](http://www.athenahacks.com)

A hackathon is a weekend-long gathering of curious minds to learn something new. Often times, attendees do this by picking up a project of their choosing to work on for the weekend. This is a great way to really dive into a topic you've been meaning to explore and you'll get to make new friends as you work in a team! Hackathons provide other ways to learn, too - you can attend workshops, listen to speakers, or network and meet with other students and representatives from companies!

**Admission is FREE and includes overnight stay, food (lots of snacks!), and swag!**

\*trans and non-binary inclusive ☺
